

Lead Paint Assessment Form and Checklist

This form must be completed by the individual performing the lead evaluation and must be maintained with the work package.

Work Order # _____

Description of Job Scope _____

Check each box to acknowledge a homogenous assessment is conducted.

- Consider the construction age of the surface to be worked on and color changes in surface coating and plan to test all areas that have different colors/shades of colors
- Identify all the visual changes in the structure and plan to test all areas that have differing finishes
- Test close to the point of operation (i.e., where cut points or weld locations will be done)
- Consider the job scope and take as many samples as necessary to enable an assessment of the entire work scope
- Attach a photo of the work area

| Sample Location / Color of Paint | Reading (mg/cm ²) | Positive or Negative |
|----------------------------------|----------------------------------|-------------------------|
| | | P / N |
| | | P / N |
| | | P / N |
| | | P / N |
| | | P / N |
| | | P / N |
